DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-34 and 43**, drawn to a method for estimating a remaining life of a functional article, classified in class 702, subclass 185.
 - II. **Claims 35-42**, drawn to a system for communication, classified in class 340, subclass 870.16.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are a method of estimating a remaining life and a system for communication.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Tracey Druce on July 7, 2006 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-34 and 43. Affirmation of this election must be made by applicant in replying to this Office action. Claims 35-42 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

Art Unit: 2857

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tracey Druce on July 7, 2006.

The application has been amended as follows:

Claims 35-42 are cancelled.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hussein teaches a system for prognosis and diagnostic of failure and wearout monitoring and for prediction of life expectancy of helicopter gearboxes and other rotating equipment. Uchida et al. teach a plant monitoring and diagnosing method and system, as well as plant equipped with the system.

Allowable Subject Matter

7. **Claims 1-34 and 43** are allowed.

8. The following is an examiner's statement of reasons for allowance: Hussein teaches a system for prognosis and diagnostic of failure. The prior art of record does not teach measuring, repeatedly, at least one of the parameters during operation of the functional article capable of assessing a total load in the article, wherein the total load represents a combined operational life shortening degradation of the article because of an interaction between the first and second parameters' combined influence on the

Art Unit: 2857

article; and estimating the remaining operational life of the article based at least in part on a calculation including a product of values of the two parameters, the calculation representing an adjusted total load attributable to the article.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
